Subject: Microsoft Settlement

The heck with everyone worried about losing their "comfort zone" that Microshaft HAS illegally woven then into - so they therefor don't want the beast bothered - MicroShaft broke (breaks) the law and NOTHING is done to them..

C'mon - All computers should be able to be PURCHASED WITHOUT any company's software on them - We should not be FORCED by MicroShaft and the DOJ to continue putting up with this illegal garbage...

Dell and all the other mfgs were BLACKMAILED by MS!!!
